

Alabama EAS Monitor Assignments

updated 1/28/26

All EAS Participants (AM, FM, TV, LPFM and LPTV) must install and deploy an EAS encoder (see 11.32) and an EAS decoder (see 11.33), certain exceptions apply to Class D non-commercial educational FM, LPFM, and LPTV stations, which are not required to install and deploy an EAS Encoder but may do so on a voluntary basis.

The decoder must be programmed to receive, at a minimum, two (2) local sources capable of receiving and relaying national level alerts/test. In addition, the decoder must monitor the IPAWS network via the internet connection.

This document lists the required local monitor sources for Alabama EAS zones. Each zone has 4 stations listed. Choose the two that you can receive clearly. If you cannot receive two of the sources accurately, contact the [Alabama SECC](#) for re-assignment.

Zone One:

Lauderdale, Colbert, Franklin, Marion, Winston, Lawrence

1. WFIQ-TV (RF Ch. 22 Virtual Ch. 36)
2. WQPR-FM (88.7)

2. WRWA-FM (88.7)
3. WOOF-FM (99.7)
4. WKMX-FM (106.7)

The Primary Entry Point (PEP) source for National level alerts in Alabama is WJOX-FM (94.5) Birmingham. We encourage all stations that are able to receive WJOX-FM reliably to add this source to your EAS unit.

Sirius XM (Channel One) and National Public Radio (Squawk Channel) serve as backup options for nationwide tests and alerts.

All required EAS activity must be logged in the Station Log, which the Chief Operator reviews weekly. For questions about EAS operation, contact the Alabama State Emergency Communication Committee ([SECC](#)).
