

Because of the success and feedback following our ABA Engineering Webinar on June 16th we have decided to continue these as a monthly offering. Our next webinar will be held on Tuesday July 21th at 10:00 AM Central Time. The format will change to having just 2 guest speakers to allow more time for their presentations.

Presenters for the July webinar will be SBE president Wayne Pecena. He has over 45 years of broadcast and IP network engineering experience and holds BS and MS degrees from Texas A&M University. Pecena will talk about the advantages of SBE membership and IT security issues.

The second half of the program will feature John George, RF Specialist along with Larry Wilkins ABA director of engineering services covering the Alternative Broadcast Inspection Program (ABIP). This is a valuable service offer by the FCC and State Broadcast Associations.

SBE members attending these webinars receive 1/2 recertification credit in Category I
